

The 5000 series has a jaw aperture of 500mm x 250mm.  
Its crushes a full UK kerbstone in approximately 30 seconds.

- Powered by a Deutz 40hp Diesel engine
- Fuel consumption only 5 litres per hour
- Wireless Remote Control System (optional Cable)
- Output size can range from 10mm through to 100mm
- CE marked

**Material:** The 5000 series will crush concrete, kerbstone, marble, paving slabs, bricks, tiles, blocks, stone, porcelain, flint, gravestones, etc.

Arrive on site and be up and crushing within 5 minutes. Crushing with the wireless remote control means using a 5000 series becomes a one man operation

#### **Optional Extras**

- Magnet Conveyor
- Motorised Screener
- Non motorised Screener
- Breaker attachment

**Output:** Output can vary according to jaw setting, loading method, loading equipment, input material, and familiarity of the loading operator. In excess of 15 tonnes per hour has been achieved.
