140	00 mm	285 I	90 kg	A21168		

AVANT general buckets are designed so that the operator can see the front edge of the bucket from the driver's seat, which means quick and easy loading and emptying. There is a grill at the upper end of the bucket which prevents stones from falling towards the operator. General buckets work normally best when it's width is same as loaders.

same as loaders. Available with straight edge – on special request also with teeth.
