

Board Lifter

- wheel mounted board lifter
- metal frame that dismantles
- twin cable for safety
- position drywall boards & panels
- insulation and sheet materials
- maximum 75kg lift
- up to 3.5 metres board lift height
- equipment weight 38kg
- tilting head adjustable to 45°

The drywall board lifter allows one man to position and fix ceiling boards and panels

The board can be raised up to 3.5 metres, swivelled through 360° and tilted to 45°

The metal frame dismantles into two main components

Board Jack

- adjustable height prop with lever jack
- maximum 50kg lift
- jack & prop up boards and panels
- fix temporary battens
- use to put up polythene screens

The board jack holds boards, battens and beads in place for fixing
